

## **For a Master's Degree**

To succeed in the master's program, students admitted through an interview must first successfully complete 24 credits of courses from the mandatory and elective course groups. Following this, they are expected to pass the defense examination of their Master's Thesis, which is produced through in-depth R&D in a specified field. Students who succeed in the exam receive the title of Master Engineer (M.Sc.). Currently, 247 students are studying and conducting research in the Electrical Engineering Master's program.

The distribution of the credits to be taken between mandatory and elective courses:

- Mandatory Courses – 12 credits (At least 1 of these 4 courses to be taken must be from the mandatory mathematics courses.)
- Elective Courses – 12 credits (The courses to be taken can be selected from the master's program or from the elective courses in the doctoral program.)
- In addition to mandatory and elective courses, a mandatory non-credit Seminar Course is also taken.

Duration for Completing Courses: Minimum 2 semesters

Duration for Completing the Thesis: Minimum 1 semester

Thesis registration can be done at the earliest in the 3rd semester.

The thesis topic should be of the nature of "Advanced research on current topics."

The program can be completed in a minimum of 3 semesters and a maximum of 4 semesters. Students who cannot complete the program in 4 semesters are granted an extension of up to 2 additional semesters in accordance with the relevant regulations.
